10 months

### Neppe

Shymkent, [neppe.kz/ru](https://neppe.kz/ru)

IT, System Integration, Internet

- Software Development
- System Integration, Technological and Business Processes Automation, IT Consulting

#### Frontend-developer

1) I was responsible for developing the user interface by transforming designs and mockups into functional web pages using HTML, CSS, and JavaScript. My task was to create an attractive and responsive interface that provided a user-friendly experience.

2) I handled the layout and styling of web pages using CSS and CSS preprocessors such as SCSS. I created browser-compatible and visually appealing web pages where elements looked stylish and well-presented.

3) My responsibility involved developing interactive elements that made web pages dynamic and functional. I utilized JavaScript and its frameworks like React, Vue, or Angular to create animations, handle events, validate forms, and provide other interactive features.

4) I paid special attention to optimizing the performance of web applications and sites. I took care of fast resource loading, file size minimization, and other optimization techniques to ensure a smooth interface operation and a positive user experience.

5) I also conducted testing and debugging of web pages and applications. I checked their functionality on various devices and browsers, fixed errors and inconsistencies to ensure proper interface functioning.

### Pro-IT

Shymkent

#### Frontend-developer

1) Interface Quality: I aimed to create high-quality user interfaces that aligned with the design and layouts provided. My goal was to achieve an attractive and aesthetically pleasing appearance for web pages, where elements looked stylish and of high quality.

2) User-Friendliness: Ensuring user-friendliness was an important criterion. I focused on creating responsive interfaces that were intuitive and easy to navigate. My objective was to enable users to

interact comfortably with web pages and applications.

3) Interactivity: I placed emphasis on developing interactive elements to bring web pages to life and enhance their functionality. This involved creating animations, handling events, validating forms, and providing other interactive features. I aimed to enable users to actively engage with the interface.

4) Performance Optimization: I paid special attention to optimizing the performance of web applications and sites. This included ensuring fast loading times for resources, minimizing file sizes, optimizing code, and employing other methods to ensure a smooth interface experience and positive user experience.

### About me

I am a dedicated and passionate frontend developer with a strong desire to excel in the IT industry. Although my journey in programming began only a year and a half ago, my fascination with coding has been with me since childhood.

Moldova has always been my home country, while for the past 6 years, I temporarily lived, studied, and worked in Shymkent, Kazakhstan. During this time, I actively pursued my growth in programming, focusing on frontend development. Currently, I possess the following skills:

HTML 5

CSS or SCSS

JavaScript

React

Redux

Vue

Vuex

Git

I am committed to continuous learning and strive to improve my skills and expand my knowledge of the latest technologies on a daily basis. I am ready to invest my potential and energy in solving any tasks assigned to me. I firmly believe that hard work, perseverance, and a desire for excellence will help me achieve my career goals as a developer.

I am prepared to provide my resume and portfolio with examples of my work for a more detailed

review of my experience ( <https://portfolio-a2eac.web.app/> ). I am eager to discuss potential opportunities for collaboration and address any questions you may have.
